Profile

Experienced Full Stack Developer passionate about crafting dynamic and efficient web applications. With a blend of front-end and back-end expertise, I specialize in delivering robust solutions that merge intuitive user experiences with seamless functionality. Driven by a fervor for innovation, I thrive on tackling complex challenges and transforming them into scalable, high-performance software solutions.

Professional Experience

2019/02 – present
Okota Lagos, Nigeria

Junior Full Stack Developer

Algorideem Technologies

Building user interfaces using HTML, CSS, and JavaScript frameworks like React, Designing server-side logic, databases, and APIs using languages like Node.js, Express, Seamlessly integrating front-end and back-end technologies to ensure smooth communication between the user interface and server-side functionalities.

Handling databases, managing data, and ensuring the security of sensitive information. Identifying and resolving technical issues across the software development lifecycle.

Debugging and optimizing applications for maximum speed, scalability, and efficiency.

Collaborating with designers, product managers, and other developers to brainstorm, plan, and execute software projects.

Effectively communicating technical concepts to non-technical team members.

Staying updated with the latest trends, technologies, and best practices in web development.

Adapting to new tools and frameworks to enhance productivity and contribute to the growth of the tech firm.

Managing project timelines, ensuring deliverables are met within the specified deadlines, and meeting quality standards.

Contributing to the design, implementation, and deployment of applications.
